Rate Yourself

Hits: 1,747

Description: 'Rate Yourself' is a web framework for building surveys like 'How cool/geeky/whatever are you?'. All survey-specific data (questions, their answers and score ratings) is read from a single file containing XML data. The questions and answers are presented to the user in random order. When all questions are answered, the user's score is calculated based on the answers' weight (as specified in the data file) and presented with a suitable comment.

Resource Specifications

Version:	08-May-2006
Platform(s):	linux, windows, freebsd, osx, sun
Date Added:	May 5th, 2006
Last Updated:	Jun 3rd, 2007
Author:	Jochen Kupperschmidt

Average Visitor Rating:  **4.43** (out of 5)

Number of Ratings: 7 Votes

Average Member Rating:  **0.00** (out of 5)

Number of Reviews: 0 Reviews
