PhotoServlet

Hits: 7,016

Description: PhotoServlet is a distributed system for indexing and viewing images. The architecture of the photoservlet allows you to distribute pieces of the photo album on different machines and/or processes. Main features include: Add an image, Simple and extensive image searching, Category view support, Set viewing style, and more. This program requires PostgreSQL, DbConnectionBroker - JDBC connection pooler, com.oreilly.servlet - servlet object that allows uploading, and spy.jar.
