Ray - Community Widget Suite. Audio/Video software for your Community.

Hits: 14,202

Description: Ray is an advanced flash based communication software for your unique website. The complete Ray product includes: flash chat with audio/video conferencing, flash audio/video instant messenger, audio/video recorder, music player, video player, whiteboard, web presence and desktop application. Your community site needs a place where all members can talk openly and feel the spirit of a real live, active community. Allow your users to have interactive communication with other members, or via private chat, to record their own video online, upload any kind of video/audio files and much more. Ray is especially developed to make your community more attractive, functional and interactive. Ray turns your site into an addictive communication venue, increasing page-views, returning visitors count and overall rate of your site popularity. Get Ray Community Widget Suite for FREE!
