webMODULES - Free Hosted Content Management Scripts

Hits: 2,249

Description: Think of webMODULES as a flexible information delivery mechanism that gives you 100% control of your information. With webMODULES you can add any of the following to your site without needing a database. You then manage and update the information just by logging into your webMODULES account from any internet browser.

- Blog
- Calendar
- Catalog
- Changing Message
- Data Table
- Easy Text
- Event Manager
- Jobs
- Knowledge Base
- FAQ
- Library
- Link Builder
- Press Release
- Q&A
- Quick Poll
- Testimonials
- What's New

Now you can build content control features into any Web site with any host without having to install any software or manage any databases.*

(webMODULES are currently available in ASP. PHP and iframe HTML will be available by May 2006.)
