Drop Down Flash Menu (Unlimited-levels) Hits: 4,865

Description: Flash Drop down menu. SEO friendly! Can have unlimited number of nested submenus. Functional flexibility and extensibility by custom Javascript. Ability to add MP3 sounds and pictures. Adobe Style design. Officially approved as Dreamweaver extension. Make your site navigation in minutes. This is ready-to-use web site menu. Change default parameters and publish. The drop down menu is saving your web site space. Because submenus are displayed over HTML content. Open Tag Inspector(F9) and you get full control of the menu appearance. You can easily set up navigation of your site as ordinary HTML links. Professional design, small file size for fast loading.

To install: If you have Macromedia Extension Manager installed, just double click on MXP file to start installation process. If you don't, download it from www.adobe.com first.

To configure: In the Tag inspector choose desired menu colors, sizes, configure navigation and search form.
