iBoutique.MALL (advanced multi vendors mall software)

Hits: 10,014

Description: iBoutique.MALL is a powerful and flexible multi vendors php mall software. It allows you to have one central mall (with all the products listed on it) and unlimited number of customized user stores. The merchants can sign up and create online their stores with ease, choose a pre-made template, customize the look and feel of their website, upload their products and start selling online within minutes. Multiple new functionalities were added in the latest version like the possibility for the merchants to use their own domain names for their stores, functionalities for selling digital products, improved shipping functionality, more pre-made templates and many others. The front site is empowered also by WebSiteAdmin and can be combined with all the modules (like Intranet, News, Links Manager, Document Manager, FAQ Manager, Photo Albums, Newsletter and others) and products of the WebSiteAdmin family (Blog System, Real Estate Portal, Jobs Portal, Car Portal, Vlog System, Pharmacy System).

A lot of functionalities, good support, May 5th, 2007

Reviewed By: mcapello

I use this software for only 2 weeks but so far I am impressed by all the functionalities available. It's great for an online mall and I am happy that I found it after long search. Also until now I sent 3 emails with questions and the support stuff answered them really fast. Great service.

Excellent script, great functionality, Aug 12th, 2007

Reviewed By: keller.mark1

I like very much this script, it has really a lot of functionalities and works fine, very stable. It came also with the full php sources and the code quality is very good. The only thing that I don't like that by default it supports only one currency and there is no way to display 2 currencies on the site. Otherwise the rest is great and the support is probably the best I've seen so far and I have purchased a lot of other scripts in the past.

Very good and stable script, Mar 21st, 2008

Reviewed By: jerome247

After a long research I've chosen this script and actually didn't find any other script with similar functionality and allowing the merchants to create such powerful and easy to customize stores. The script is very stable and works well, no problems so far. I liked very much that the company provides also the full sources, not encrypted,
at no extra cost which is great if some customizations are needed.
Overall very good script for a mall website, I highly recommend it.
