**Description:** To get this modul to work with your nuke site you need to register your clan at <http://bf2tracker.com>.

You'll receive then clanid that you add to variable clanid in index.php file.

Phpcusa is not taking any credit for creating main code (i couldn't find the guy that create the main code anyway thanks to him) only for modification to get it working with nuke. I tested this module on Nuke 7.6 version 3.1 patch and also on Nuke Platinum 76b4.
