Movie & Video Player Alegria

Hits: 17,236

Description: State of the art flash video player - convert all your movies and upload them to your server. Our flash video player will play all your movies in your browser after they are converted into .flv-files. Set your own quality settings and size. Give your visitors video on demand, full movies or just previews.

Very nice and easy to handle videoplayer, Jun 1st, 2006

Reviewed By: sgagliardi

I always wanted to display some previews on my site so that users can see movie in my browser through my website. Now I can offer as many as I can and I don't even have to have the knowledge to get it online working. Super!

Streaming movies running perfect!, Jun 4th, 2006

I'm running the free video player at this moment. But because of this service that I can offer at my website I have already talked to HotWebScripts.com of a branded customized version and they have told me they would come out with one in these next two weeks. So besides the good scripts they have also a great service. That I would like to see more often at other companies. These are people that think with you. Good job!
