MWEB Site Manager

Hits: 1,405

Description: MWEB Site Manager is a simple, but very powerful and flexible content management system for ColdFusion developers. It installs easily in minutes and includes page management, dropdown menu creation, a mailing list manager, news and link management, easy template customization, sitewide error handling and much more. View our website for more details on how you can use MWEB Site Manager to cut days (or weeks) off of your next project.
