# PhpMyAdsense

Hits: 3,458

**Description:** PhpMyAdsense(c) was made to work as an active desktop channel to keep track of google adsense account's activity. With a little playing, it now works with templates, colors, css and can be customized/tweaked to integrate in any form of web application you like. phpMyAdsense(c) is a PHP web application designed specially to provide detailed statistics of your Google™ AdSense™ advertiser's account in real-time and using your own customized templates and colors.

PhpMyAdsense(c) can be run as a Microsoft™ Windows™ Active-desktop channel, phpNuke block, phpBB module and/or any other web application you might be already using.

This script is very easy to set up and is great if you wish to consolidate all your adsense data in one place where you can view it easily. The script allows you to view your adsense revenue from your desktop or online. The script works by obtaining this information from your adsense account and presenting it in a simple, user friendly interface. I would strongly recommend this script!
