PHP ManualMaker

Hits: 1,046

Description: PHP ManualMaker 1 meets a demand DeltaScripts had for its own products. It is a program that lets you document your system and let the user get fast access to step-by-step instruction on all aspects of your software with a clear information layout. It's not a traditional FAQ or knowledgebase system!

The end user may vote on articles, get a pdf version of the manual, search or even give comment. Administrator may publish WYSIWYG articles, upload pictures, resize pictures, approve comments and generate PDF documents. It supports unlimited number of manuals.
