DP ASP Calendar 1.0

Hits: 7,242

Description: A Calendar purely written on VBScript. Toggle between years and months. Today appear in silver. Good for learning Date Functions in VBscript. Can be included anywhere on your existing ASP pages. You can also use the other file where you can add schedules to dates more like an Event Calendar. Includes an admin area where you can add,edit and delete schedules. Really neat!

Resource Specifications
