FormSpring

Hits: 703

Description: FormSpring is the easy way to build, host and process online forms. It includes a point-and-click form builder that you can use right from your web browser, without you having to download any additional software. Forms hosted at FormSpring provide you with the ability to download form submissions to an Excel spreadsheet, receive submissions via an RSS feed and more. FormSpring is also ideal for capturing sensitive data, given its security features such as 128-bit SSL, PGP email encryption and secure database encryption technology.
