Google Site Search Plugin Generator

Hits: 1,027

Description: This utility allows you to create a Sherlock search plugin for your website that uses Google's custom search facility. A Sherlock search plugin allows people using browsers like Firefox to search a website directly from their browser.

This utility also generates the code for a Google search box that performs the exact same search as the plugin. The website that you want to search on needs to be indexed by Google for the search box and plugin to work.

Resource Specifications

Version:	n/a
Platform(s):	linux, windows, freebsd, osx, sun
