Snipeet

Hits: 1,912

Description: Use this application to provide a repository for code snippets with syntax highlighting. Tagging, rating and comments are built in the application. In addition, a set of moderator action - to remove or modify snippets, tags or comments - allows the repository to keep clean without any intervention in database.

Ajax rating and preview make the interface easier to use.

This application is free, open-source and built in PHP5. It requires symfony and MySQL.

Resource Specifications

Version:	1.0
Platform(s):	linux, windows, freebsd, osx, sun
Date Added:	Jun 17th, 2006
Last Updated:	Jun 17th, 2006
Author:	François Zaninotto, Fabien Potencier

Average Visitor Rating:  **3.80** (out of 5)

Number of Ratings: 5 Votes

Average Member Rating:  **0.00** (out of 5)

Number of Reviews: 0 Reviews
