# TSPlayer - Flash Music Player

Hits: 15,348

**Description:** Website based Flash music player that allows a website user to enjoy the features of a powerful music playing software. TSPlayer allows the user to play music, stop, skip to the next track or the track before, pause a selected track, select a random track in the playlist and jump to it, set the playlist to random playing order or to repeat itself, increase/decrease the volume or set it to mute, balance the sound between both stereo speakers and also drag along a selected track to play it.

This flash music player allows configuration of start volume, autoplay, shuffling, show or hide playlist, autorepeat, and others. Skin support is available for this music player.

### **Good flash music player**, Aug 9th, 2006

Reviewed By: peterhartmann

That's a good synchronous download mp3 player. The configuration covers all basic needs, the skins are well designed and documentation is available. However I suggest including in next versions the option (configurable value) for synchronous or asynchronous download of the song files.
