tinyMuw CMS

Hits: 5,128

Description: FREE CSS-DRIVEN TEMPLATE WEBSITE INCLUDED AT NO COST! Recently developed for the PHP community and licensed under the Creative Commons License (CCL), this script is a very secure and actively, aggressively developed Content Management System (CMS). It is backed by the power of MySQL databasing with the simplicity of PHP acting as the host language. THIS CMS SUPPORTS VIDEO PODCASTS USING GOOGLE VIDEO (that means it costs no bandwidth)! Simple and easy to use, developers place an emphasis on security and active, aggressive development. Keep your eyes on this script because it's growing fast. It is also the first and only CMS fully developed in a combat theater (specifically in Baghdad, Iraq by an American infantryman). Stop by the site and take a look!

Resource Specifications

Version:	v0.1.1
Platform(s):	linux, windows, freebsd, osx, sun
