# SimplePie

Hits: 6,182

**Description:** SimplePie is a very fast and easy-to-use class, written in PHP, that puts the 'simple' back into 'really simple syndication'. Flexible enough to suit beginners and veterans alike, SimplePie is focused on speed, ease of use, compatibility and standards compliance. Complete function documentation, tutorials, and instructions. Developers are very responsive to user feedback, suggestions, and bug reports. Read about features from <http://simplepie.org>

I've been an ASP developer for about 10 years. Three months ago, I switched over to PHP. Being new to PHP, I was looking for something simple, yet powerful to be able to RELIABLY parse & cache RSS and Atom feeds. I found a few classes out on the net, but nothing worked well. Then I found SimplePie! I wrote 20 lines of code, and was able to parse pretty much any RSS/Atom feed I could find. 300 feeds and counting. Thank you for providing such an invaluable tool. SimplePie Rocks!
