Would love it if it worked, Aug 3rd, 2006

Reviewed By: monikart

i checked out the site and the gallery looked really awesome. i purchased it, loaded it and after installing it and logging into the admin i could not successfully add categories or images. everytime i made a change int he admin, i had to log out, close my browser and then see the changes i made when i logged back in. i contacted the sit eowner 4 times for about a week and have yet received a reply. i would really like to get it working because it looks nice and it would save me a lot of time.
