I found this software to be one of the easiest to use ever. All you need is a server with PHP, & MySQL and your set. Powerful shop and product configuration allows for rapid production use. This is one of the best programs I have ever used.

Downloaded and installed it without any problems... Template editing is simple, because of that you don't need to be a PHP buff, so this script suits everyone. Admin is also easy to work with. The available options are better than any other 'free' ('free' meaning "Powered by Cart97 PRO copyright notice..." on pages) script around... Great script!

### **One of the best cart scripts**, Apr 6th, 2007

Very easy to install, very flexible, very easy to use. Has unlimited categories depth level, custom skins, easy to change language.

Can be better: needed category to have its own image and large description, and this script will be ideal for shop owners
