dhtmlxTabbar :: Ajax-enabled JavaScript Tab Control Hits: 4,281

Description: Cross-browser, XML driven and fully configurable JavaScript tab bar provides simple but powerful solution to create dynamic tabs. You can place various content within tab pages and build intuitive tabbed navigation interface. The tab content can be displayed in IFrames or dynamically loaded on demand with the aid of AJAX. The tab control supports multiline, scrollable and nested tabs and allows easy initialization through simple HTML.

Resource Specifications
