RoundCube Webmail

Hits: 15,570

Description: RoundCube Webmail is a browser-based multilingual IMAP client with an application-like user interface. It provides full functionality you expect from an e-mail client, including MIME support, address book, folder manipulation and message filters. RoundCube Webmail is written in PHP and requires the MySQL database. The user interface is fully skinnable using XHTML and CSS 2.

A fantastic product. Seems easy to install with forums for help. However, I was not happy with the fact that it is not for POP3 and only runs on IMAP. If there is a POP3 version out there, i have not come across it yet.
