The only person who can understand how this program works is the developer. The documentation sucks. If you are not completely familiar with setting up an affiliate program..find another program

Just wanted to say that JAM is an amazing affiliate program. It's very user friendly, and installs very easily. The support team has been very responsive with my questions as well.

Thanks JROX Team!

I downloaded this software based on a referral from one of my online friends. All I can say is: Wow!!! The interface is so easy-to-use, plus the 3-D Flash-Based reporting adds quite a little extra. What brings this over the edge is the great support team behind it, as seen by many over on JROX's support forums. Great Job!

I have been using this software to manage my affiliate scheme for bittorrent marketers at cash4uploads.com, for a few weeks now and it works a treat! It has great flash graphs that let me see click to sale ratios ect. It's really flexible and the customer support is brilliant. Im really glad I chose Jrox.
