QuickGal

Hits: 11,265

Description: QuickGal is a simple and fast PHP+GD gallery script ! It doesn't require any database nor difficult setups .. just upload your picture folders and the script will automatically detect them and generate some neat and functional galleries :)

QuickGal supports dynamic thumbnails generation, flat-file picture descriptions, multiple albums, easy layout customization, and uses Ajax technology for fullscreen pictures viwing, and slideshows (browse all images just by hitting the "N" and "P" keyboard keys) !

This script is compatible with Firefox, Internet Explorer and Opera. Try it !!
