# AV Recorder

Hits: 1,357

**Description:** AV Recorder allows users to enhance traditional online communications by replacing old, still images and text with new and advanced audio/video recordings. This technology can be used in a variety of applications such as video blogging, video profiles, sending video messages, e-cards, and more. Video Recorder is easy to install, deploy and configure for use with any website.

AV Recorder is completely customizable and integrates seamlessly with existing client database and all scripting languages including PHP, .NET, ASP, ColdFusion, CGI, JSP, etc. Cross platform support.

Custom branding and integration available. Dedicated licenses and Hosted options available.

- \* Improve Guest-To-Paying Member Conversion
- \* Add custom-branded, audio video messages, profile and content to your online community.
- \* Increase member retention and users online time.
- \* Offer premium subscriptions with Audio Video features.
- \* Multi-Language Support for most languages.
