I have searched for an efficient and simple WHM automation system for years and finally found it. I have used Arron's WHM scripts for a few years now and they were good, simple and easy to setup and run, but his version 3 is frosting on the cake. Arron has really outdone himself this time. It is clean and very neat looking. It installs automatically without a hitch, and it is a complete WHM, cPanel, client, and hosting plan manager. This script is ideal for any web host, reseller thru dedicated.
