works fine but the August 2006 demo may be misleading, Aug 23rd, 2006

Reviewed By: denver

As of August 2006, the online demo gives the appearance that multiple buttons can be generated at one time. This is not the case. You make one button at a time. I mistakenly assumed from the demo that this script might be integrated into an existing cart, to create a basket consisting of multiple items. This is not the case. Otherwise, the script works fine.
