Complete Menu Solution

Hits: 3,585

Description: DHTML list-based menu.

Main features:

- support of animation plugins to implement any kind of animation for open/close.
- support of menu tree modifiers to create custom effects, events processing, context menus.
- support of templates/skins to make as flexible menu as possible: list, horizontal, vertical, dropdown, tabbed and much others.
- Ajax ready.
- support of both quirks and CSSCompat browser modes.
- browsers supported: IE5.0,5.5,6,7, FF1.0+, Mozilla 0.9.3+, Opera 7+, Safari 2.0+ and others.

This menu is designed to make navigation as easy as possible.

Resource Specifications

Version:	0.5.11
