Anteil OpenCRM

Hits: 68,704

Description: Anteil is a PHP/MySQL-driven Web-based Customer Relationship Management (CRM) application designed to help you better identify, attract, retain, service and support customers. Employing full Web architecture, this open-source solution is a fast and easy way for your company to implement a basic CRM application. At the same time, it gives programmers a head start in developing a more customized solution. Main features include: Consolidated account information, Contact manager, Sales opportunity manager, Corporate communications, Calendars, Sales forecasting system, and High-level security.
