## EBA-News

Hits: 9,632

**Description:** EBA-News is a powerful and free news management system, written in PHP which utilizes MySQL as the backend. It provides a friendly user interface with a great functionality. With automatic installation, you can have a professional looking and secure news management system ready to use in mere minutes. Key features include webpage administration, image administration, gravatar and comment support, a powerful news archive, advanced comment filters to prevent spam, template driven article and admin output and multiple user support. EBA-News supports open standards, and creates a table-free layout with validating XHTML and CSS code.
