### **Disappointment! No Support Lots of BUGS!**, May 23rd, 2008

Reviewed By: MZIBRO

This is the first time I have ever posted a review but thought it was necessary. I purchased this JiROs product hoping to have an easy way to send newsletters from a small site that I do maintenance for. Main reason is that it seemed as though they would support the product.

I have had 3 issues that I have written to request information - but received no response! I would say anyone who is not a programmer - stay away - or end up with a lot of wasted time and unhappy customers!
