XtraFileHost

Hits: 5,994

Description: XtraFileHost is a opensource continuation of flatFileHost with many addons including a new countdown timer, better admin panel, easier templating system, and much more! Mods coming soon are a real progress bar, control panel, and way more! With real time developers working on the script, we will have these available in no time!

This script is created to compete with file hosts such as RapidShare and MegaUpload!

Resource Specifications

Version:	1.1
