2 level horizontal tab menu

Hits: 7,363

Description: A CSS based tab menu that supports a secondary level of menu items. Both levels are horizontal, so there no drop down menus that may become hidden underneath form elements in browsers such as IE.

his flash menu will easily change the look and functionality of your web site, it has a nice looking design and it can be customized very easy, you don't need flash skills, all you need to do is change the text in the XML file, you open the XML file with a text editor like notepad from windows and you change the button text,
