The Net Guys: ASPired2

Hits: 1,341

Description: The ASPired2 line of ASP applications encompass a wide variety of common functions. The concept of ASPired2 is to create functional yet easily modifiable modules that can be easily integrated into any ASP web site. As time permits, The Net Guys plan on releasing several applications. With a NO NONSENSE licensing agreement (i.e. you buy it, you can use as many times as you want) and well formatted, clean code, these applications will make your development a snap.
