# ASPired2Count

Hits: 956

**Description:** ASPired2Count is a hit counter for displaying how many times your page has been viewed. Every time one of your pages is displayed, the page hit is tallied in a database. The concept is simple. The implementation is even easier. ASPired2Count is Easy2use

\* Easily integrated Access database \* Only 2 lines of code per file \* Display hits in either text or graphical form \* Use graphics of your choice \* Simple set up
