# Wsmake

Hits: 6,168

**Description:** Wsmake is software written in C++ for aiding the production and maintenance of websites. It was written to reduce the amount of time it takes to make changes to common information across a website. Wsmake has been engineered with the goal that reusability in website creation be maximized while keeping your content separate from your design. If you have common elements on each page of your website, you are a likely candidate to find the time-savings associated with wsmake valuable.

## Resource Specifications
