tHomepages

Hits: 2,134

Description: tHomepages is homepage community software designed to work on almost any PHP-enabled web server. Linux is recommended. tHomepages makes starting a homepage community like Geocities or FreeHomepages.com simple and easy. tHomepages has modules and programs to help for integrating into your website. All you need to do is install it, create your homepage community website, and tHomepages will take care of the rest. tHomepages doesn't require a MySQL database and passwords are protected by MD5 encryption. All data is stored in flat-file databases.

Resource Specifications
