PHP CSV Importer 3

Hits: 5,743

Description: This all-new version allows users to upload their csv files directly using the script or files already on the server. Using the easy-to-use interface of drop-downs and buttons, the users can preview their file, select the table and then insert the data into MySQL.

This version contains a config file so letting other not-so-experienced users use the system is no longer a hassle!

PHP CSV Importer runs on templates and CSS so you can re-design all you like! It also supports multiple languages, too. Remember to read the terms and conditions before you begin. d:-)
