PHP eMail Manager

Hits: 2,495

Description: PHP email manager is an easy to use mailing list program allowing you to create mailing lists on your website. The software supports multiple lists, optional fields, merging, full HTML editing and many additional features. The software works with MySQL databases and is easy to install and use. Other features include welcome and leave messages, easy subscription and unsubscription, as well as task based administration. Advanced features allow you to configure additional aspects of how mail is sent.
