## UploadScript - Free Upload Script (Rapidshare Clone)

Hits: 44,069

**Description:** Looking for an upload script that works like Rapidshare or Megaupload? This script is the latest and most advanced available -- and LOADED with features!

Uploadscript is a free, php based script. It is extremely easy to install. It requires no mysql database and can be installed on any virtual/shared or dedicated hosting running PHP4 or PHP5 (most servers do). It is fully and easily customizable.

Users can upload from their HD or from a URL, view all files or top 10 files...

Admin can: set allowed file types, block certain file extensions, set maximum file size, set file expiry time (after X amount of days of inactivity), set countdown timer on download page, set time limit between downloads, enable/disable files list, if files list enabled, set number of files displayed per page, enable/disable top10 list, enable/disable email option (send file link to a specified email address), view bandwidth usage, view files reported as illegal, delete files, ban files or IP address...

My server wasn't set up properly to run the script and Sunny followed through quickly and efficiently and fixed the problem. I'm extremely pleased and was very impressed by the high level of service and excellence of this script. It comes highly recommended!

**Nice script for beginning**, May 14th, 2007
