Sound in Flash without Action Script

Hits: 1,167

Description: Always, when you import a sound into a Flash, it seems very "cool" and "grace". The sound is very important when you using it for some elements in your web site (flash menu, flash intro, some presentation..), because it makes your web site more powerful and it will leave a better impression.

This tutorial will teach you how to import a sound into a flash, how to create a button wich will make a sound on click. This tutorial is for beginners who have no experiance of using Flash.
