WebMail - Corporate Email Processing

Hits: 759

Description: WebMail is a full featured online email processing service offered to companies or individuals who want to have their own email service @yourdomain.com. Each WebMail (domain) account comes with an Admin Panel, where your company's web administrator or IT person will have control of all email accounts (create, edit, change password). Each user can choose between using WebMail interface and your favorite mail program (Outlook Express or other) or both.

System is affordable for personal use. You can have your own personal WebMail system based on @mydomain.com and serve your circle of friends or family members impressing them with your own professional grade email system. Prices begin at \$20.00 per month (\$95 one time set up fee – personal accounts only) per up to 20 mail account (mailboxes), plus your own Admin Panel account.
