phpBB Hosting Creator

Hits: 2,422

Description: This script will automatically create installations of phpBB on your server.

The forum is created by logging into cpanel and fantastico using details you configure in the config.php file. .

Users of your site can then use this script to signu for their own free phpbb forum at the url: http://www.yoursite.com/t heirforumname.

The script automatically configures the admin area and sets up the forum using details your visitor enters. It offers all the full flexibility of phpBB, including features such as templates, moderation, forum control etc. It does not require mysql.
