Moonlightchest Sitemap Generator

Hits: 2,672

Description: If you are looking for a FREE and easy to use sitemap generator that can generate Google and Yahoo sitemaps for your search engine submission, Moonlightchest Sitemap Generator is what you are looking for.

Moonlightchest Sitemap Generator is written in ASP. It creates a simple Google XML sitemap and a Yahoo plain text sitemap in one go.

The pro of this generator is, by recognizing the meta tags found on your web pages, it will not list down those include files, admin web pages and etc. on your sitemap file. The con is, your web pages needs to be tidy with the necessary standardized meta tags on all your content pages. So, it will not work well if your web site is unkempt.

No official support is available for this script but you may post support questions at: <http://forum.moonlightchest.com/message.asp?no=15>
