## ListMessenger Light

Hits: 19,122

**Description:** ListMessenger Light, the sister version of our successful ListMessenger Pro product, includes many of the great features that are found in the Pro release. This no cost program is perfect for smaller websites that need a reliable electronic mailing list or newsletter solution that can be running in minutes. If your mailing list grows beyond the recommended subscriber base of 200, upgrading is easy and trouble-free. For a full feature list, visit our website or feel free to ask questions in our friendly public forum. Some features of ListMessenger Light include: easy installation & upgrades, message composition in both text and HTML formats, e-mail attachments, multi-group sending with duplicate address removal, easy backup and restore system, custom e-mail fields and variables, public archives with RSS syndication, multi-lingual end-user tools, CAPTCHA form protection, automated unsubscribe links, subscriber signup details, administrator notifications and more, available at no cost!

**Excellent Script**, Jan 28th, 2007

Reviewed By: ramdhar

I tried a number of scripts and was totally fed up by their buggy behaviour. Something or the other would never work and I was tearing my hair out in frustration. But LiteMessenger light was not only easy to install but it worked like a charm from the word go. The examples on putting a subscription box on your front page are excellent. The interface is simple yet very elegant. I am really delighted with this script and wholeheartedly recommend it. The free version does not support attachments.
