## MultiPowUpload PHP package.

Hits: 40,942

**Description:** Multiple files upload component. It is easy client-side solution that can be used to perform file uploads from a user machine to the web server. Also, in installation package include server-side PHP file upload scripts for IIS and Apache web servers.

It's features include: multiple file selection, rich progress and status information, file filters by extension or size, access to file dates information, possibility to cancel an upload anytime, download multiple files, supports SSL (HTTPS) and authentication, multilingual and customizable interface, Interface can be replaced with custom HTML and Java Script code and much more. This component is a Macromedia Flash movie supported by most browsers and needs just Flash player plug-in on users-side and any standard file upload script on server-side. This component supports any browsers (tested in IE5+, FireFox 1.5, Netscape, Opera) and client side OS (Windows, Unix, Mac OS).
