Flash Star Effects

Hits: 2,156

Description: On this tutorial website, we aim to explain Flash techniques for working with objects with a star shape, in order to obtain cool animations with great effects.

You will learn how to create your own stars from scratch, or where to look for one, how to make a star blink, fall, or how to make it move like crazy in your movie. After reading our indications and studying our samples we hope you will also have the ability to recognize a perfect picture for the background when you see one.

The examples presented are designed to be medium in difficulty so you will need some Flash experience in order to fully understand them.

Just to name some topics, you will learn to design: falling stars effects, fireworks effects, sparkling nubbles effect, light effects and much more.
