Super NDA

Hits: 949

Description: Super NDA is a php script that allows your business to maintain a complete record of all non-disclosure agreements online, in a mysql database. Members fill out their credentials, register to the system, Read, Accept and Digitally Sign the document. Admins are sent a email once the member completes the process.

This makes Super NDA a indispensable tool for companies who require non-disclosure agreements. Super NDA can be used in just about any scenario for any business who requires empirical confidentiality of their products, services, trade or resources.
