# Display Different Content for Different Countries

Hits: 1,049

**Description:** This code example shows you how to display different content to users from different countries. This can be used to implement a multi-lingual user-interface or display localized ads to users from different countries. It can also be used to block users from countries where the content is not legal.

## Resource Specifications

<b>Version:</b>	3
<b>Platform(s):</b>	linux, windows, freebsd
<b>Date Added:</b>	Sep 18th, 2006
<b>Last Updated:</b>	Sep 18th, 2006
<b>Author:</b>	kaparo
