The Web Video Player™ - Flash FLV Video Hits: 9,061 Player

Description: The Web Video Player™ is an easily customized FLV video player that makes it simple for anyone to add powerful, interactive web video presentations to any web site. It is available exclusively to members of WebVideoZone.com.

Features include the ability to: change color and size; add a custom 'click-to-play' image, and clickable exit image; display clickable pop-up image while video plays; have video start automatically after a delay or when the page loads; auto-redirect to another web page after video has finished.

Viral features include the ability to: add custom branding text or image link to the player; and, include 'tell a friend' and 'add video to site' buttons.

You remotely control your video players via your control panel, where you can monitor your player's viewing statistics, and make changes to your videos across multiple web sites in real-time.
